Art Unit: 1796

REASONS FOR ALLOWANCE

1. Claims 1, 3, 4, 5, 7, 8, 12, 14-18, 21-28, and 31-32 are found to be allowable.

2. The references cited in this action are merely to demonstrate the state of the art in super

critical cleaning of semiconductors.

The following is an examiner's statement of reasons for allowance:

4. The examiner agrees with those arguments regarding the rejoinder of the method claims.

As these claims are dependent upon allowable claims, the methods containing those same

limitation would also be allowable.

5. The applicant has amended claims and now excludes the addition of formic acid as well

as any other additional components such as surfactants etc. As the prior art requires either the

inclusion of the formic acid or some other additional component now excluded by the instant

claims.

6. As for claim 28 the prior art fails to teach the applicant's composition. In particular the

composition containing the ion-implanted photoresist residue in combination with the other

ingredients was not found in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the

payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for

Allowance."
